

Claymark® Centurion™

Exterior Trim that Defies Comparison.

Claymark® Centurion™ Tru-Core® Treated Finger-jointed Radiata Pine is the Next Generation of Primed Exterior Trim.

- FSC (Forest Stewardship Council) Certified, manufactured in New Zealand to exacting eco-standards from the log to the finished product.
- TruCore® protected Centurion™ boards are highly resistant to rot, decay and termite damage when used as recommended and are backed by Claymark's 50 Year written limited warranty.
- TruCore® fully penetrates to the core of the board. As a result, cut surfaces, ends and drilled holes do not require retreatment at the jobsite. This is ensured by a quality protection program that includes Independent Auditor verification.
- The TruCore® protection system is user friendly and does not include volatile organic solvents, heavy metals, arsenic, chromium or similar metals and has no offensive odor and thus can be used for interior applications.
- The TruCore® protection system components have been used for over 50 years with an excellent performance history.
- The TruCore® protection system components are recognized by the Window and Door Manufacturers Association (WDMA) and the American Wood Preservers Association (AWPA). Active ingredients are registered with the U.S. Environmental Protection Agency (EPA).
- A new generation acrylic primer system: The prime coat has been formulated with excellent adhesion, minimum tannin bleed, and maximum filling properties. The undercoat has been formulated via use of modified acrylic technology delivering maximum toughness while not compromising the exterior durability of the product.

Sleep Soundly at Night Knowing You are Offering Customers a Trim Product that is Unrivaled by Any Other on the Market Today.
